

 **Beef & Dairy** **Cloud-Based** **Secure** **No Manual Backups**

Complete cattle compliance — from movement records to milk statements.

TB testing, BCMS movements, medicine withdrawal periods, and Red Tractor audits — all in one platform, accessible from the office or the parlour.

KEY FEATURES

-  **TB Test & Reactor Tracking**
Test dates, read dates, reactor records, and automatic re-test reminders in the farm planner.
-  **Withdrawal Period SMS Alerts**
Automatic alerts fire before any medicine withdrawal period expires — for every treated animal.
-  **Dairy Performance Analytics**
Milk yield trends, bulk tank ABR, somatic cell count charting, and monthly statement uploads.

Livestock & Feed module · add Vet Ledger, Dairy & Equipment as you grow

Free 30-Day Trial

No credit card required

A CLEARER WAY TO STAY COMPLIANT

Everything your herd needs, in one connected record.

Bring livestock, medicine, dairy, safety and equipment records together so your team can act quickly and your audit trail is always ready.

Herd performance

Individual animal records, calving, BVD, DLWG and sell-out information in one herd register.

Vet Ledger

Purchase and treatment records with batch tracking, prescriptions and automatic withdrawal dates.

Dairy and equipment

Monitor milk performance while keeping inspections, services and calibration records to hand.

Start with the records you need today.

Add modules as your herd and business grow — with a free 30-day trial.
