

 **Sheep & Goat** **Cloud-Based** **Secure** **No Manual Backups**

EID compliance, flock performance, and lambing analytics — all in one place.

Movement reporting, EID tag management, lambing records, and IPM plans — built for the detail and seasonal pressure of sheep and goat production.

KEY FEATURES

-  **Direct LIS Submissions**
One-click movement submission to LIS API with batch tag upload and full submission log.
-  **Lambing Season Analytics**
Perinatal mortality charts, scanning percentages, and DLWG trends by lamb group — season on season.
-  **IPM Compliance Records**
Pest threshold logs and intervention decisions stored in an audit-ready format for Red Tractor.

£35 /month

Livestock & Feed module · add Vet Ledger and IPM for a complete compliance setup

Free 30-Day Trial

No credit card required

FLOCK RECORDS THAT WORK HARDER

From EID to lambing, keep every decision connected.

Replace scattered notebooks and repeat entry with a flock record that gives you a dependable history for every season.

EID and movements

Record tags, batches and movements with a clear submission history for your farm.

Lambing insight

Turn scanning, births and losses into practical season-on-season performance measures.

Health and IPM

Keep treatment, vaccination and threshold-based IPM evidence ready for an inspection.

Keep your flock moving forward.

Build the setup around your holding, with a free 30-day trial.
