

 Viticulture Cloud-Based Secure No Manual Backups

Vine records, winery management, organic compliance, and harvest traceability — built for UK vineyards.

From phenology and disease scouting through pressing, fermentation, and bottling — BDE Farm Trac covers the full vineyard-to-bottle compliance record trail.

KEY FEATURES

- ✓ **8-Tab Winery Management**
Harvest reception, pressing, fermentation, vessel register, cellar ops, bottling, SO₂ testing & equipment.
- ✓ **Organic Viticulture Module**
Copper running balance (28 kg/ha per 7-year limit), derogation case management, and certifier records.
- ✓ **Automatic SO₂ Compliance**
Free SO₂ checked live against UK-retained EU Reg 203/2012 wine-type limits — no manual lookup needed.

FROM VINE TO BOTTLE

A connected record for the whole vineyard and winery.

Give your team one place for block records, harvest traceability, cellar operations and the compliance evidence behind every bottle.

Vineyard operations

Maintain block, phenology, canopy, disease scouting and harvest records by variety and location.

Winery production

Follow fruit through reception, pressing, fermentation, cellar operations, bottling and SO₂ checks.

Organic readiness

Track inputs, copper totals, derogations and certification evidence alongside daily production records.

Spend more time making great wine.

Viticulture bundles essential modules with a free 30-day trial.
