For Growers & Winemakers in Great Britain™

VINEYARD

The UK's only monthly publication dedicated to viticulture and commercial wine making.

Content is usefully technical, including valuable expertise across agronomy, varietals and machinery and processes.

Contributions from both world-renowned wine journalists, current growers, wine makers and agronomists enables the brand to underpin the vibrant and burgeoning UK wine industry.

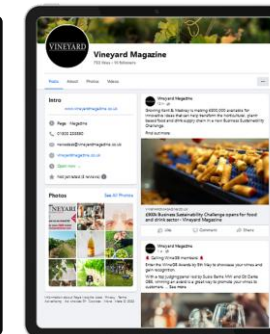

Posted direct to named individuals at every UK vineyard and winery all readers are verified and/or requested. Every member of WineGB receives a copy of Vineyard as part of their membership.

*The same team also organises the industry's main in-person event: **The Vineyard & Winery Show**, held every year in November.*

Black Chalk secures distribution in US for first time

A photograph showing two bottles of sparkling wine and two glasses filled with sparkling wine. The bottles are dark with white labels. The glasses are tall and slender, filled with a golden liquid and topped with a white foam. The background is dark and textured.

Black Chalk and look forward to introducing American consumers to an incredibly high-quality winery from what is such a dynamic emerging category. We can't wait to share these wines with our trade customers and start the beginning of what we believe will be a long and fruitful partnership."

February 14, 2023

MATTHEW JUKES: W

●●●●●

This month Vineyard magazine
The Wine Garden of England
organisation aiming to increa

Originally part of the team at The London Wine Club, Jo Smith has been Brand Manager at the Wine Society since 2007. "My interest in wine around wine has taken many different directions," she says. "I was a wine writer for BBC Radio Kent as a monthly slot with Julia Gurney, and I did an interview with Patrick McGrath at Dorian. It was a shame someone was already doing it," she says. "I was then asked to be the position of Brand Manager. Jo Smith here to realise how much I love talking to people about wine. Being a tour guide has been really helpful in this regard."

Three bottles of wine are displayed side-by-side. From left to right: a bottle of Bride Valley Pinot Noir with a white label and a gold foil-wrapped cork; a bottle of Simpsons Pinot Noir with a dark label and a black foil-wrapped cork; and a bottle of Stophard Pinot Noir with a dark label and a yellow foil-wrapped cork. The labels for the latter two bottles are partially visible, showing the brand names and 'PINOT NOIR'.

"What's in a name? That which we call a rose by *any* other name would smell just as sweet." Shakespeare used this line in *Romeo and Juliet* to suggest that the naming of things is irrelevant. But is it?

I have selected three wines this week that use carefully chosen words to convey a deep sense of understanding about the wine in the bottle. Each winery uses different words as prompts to deliver information and instruction.

HP Segments, the UK's leading fruit and vine machinery specialists, is pleased to announce the appointment of Ash Bailey to their new Sales Representation.

Ash, who has previously worked for a Land Rover main dealer and spent several years in tractor and machinery sales across a wide range of farming industries, will now be focusing on the horticultural and viticultural sectors in his new role.

Already experienced in working with French, which he believes is the best tractor option for fruit and vine growers, Ash will also be visiting growers across the UK with advice and machinery options from the world's best manufacturers such as Avesa, Berthoud, BMF, Ursin, Clemens, EMU, Fieser, Horsch, OLL, Polverio and the Petti van Willem.

"Since my dad, Nick Seymour, started this business in 1972, HP Seymour has been a

Claire Seymour, Sales Director at H.P. Seymour, commented that Ash's new appointment will further strengthen the sales team at H.P. Seymour.

leading force in the U.S. fruit and wine industries. Many dealerships have expanded into these sectors, but we are true specialists and our decades of experience mean we understand growers' needs like no one else. With DAIR experience and passion, we are confident that we will help us continue to provide the best service and equipment to our customers."

As a location with increasing well-suited conditions, the market needs to continue to be developed. Branding and sales advice brings marketing expertise.

Organic and biodynamic

TEXT BY MEMORANDUM

Small-scale, self-sufficient, organic and biodynamic farming is becoming a trend in the UK, with a growing emphasis on local food and sustainable practices. This article explores the benefits and challenges of these farming methods, and how they can be implemented on a small scale.

THE BENEFITS OF ORGANIC AND BIODYNAMIC FARMING

Organic and biodynamic farming are two different approaches to agriculture, but they share many common goals. Both aim to produce food that is healthy, safe, and sustainable, while also protecting the environment and supporting local communities.

Organic farming focuses on using natural methods to control pests and diseases, such as crop rotation, composting, and using natural predators. Biodynamic farming goes a step further, incorporating spiritual and holistic principles into the farming process. Biodynamic farmers believe that the farm is a living organism, and they seek to create a balanced and harmonious system that works with nature.

There are many benefits to organic and biodynamic farming. One of the most significant is the improved health and safety of the food produced. Organic food is free from synthetic pesticides and fertilizers, which can be harmful to human health. Biodynamic food is also believed to be more nutritious and flavorful than conventional food.

Another benefit is the environmental impact. Organic farming uses fewer synthetic inputs, which helps to reduce pollution and protect the environment. Biodynamic farming also emphasizes soil health and conservation, which can help to improve the long-term sustainability of the land.

Finally, organic and biodynamic farming can support local communities and economies. By growing and selling locally produced food, farmers can help to reduce the carbon footprint of the food system and support local jobs.

THE CHALLENGES OF ORGANIC AND BIODYNAMIC FARMING

While there are many benefits to organic and biodynamic farming, there are also challenges. One of the most significant is the cost of production. Organic and biodynamic farming often requires more labor and resources than conventional farming, which can make it more expensive to produce food.

Another challenge is the lack of government support. Organic and biodynamic farming are still relatively new in the UK, and they do not receive the same level of government support as conventional farming. This can make it difficult for farmers to compete in the market.

Finally, there is a growing concern about the authenticity of organic and biodynamic food. Some farmers may claim to be organic or biodynamic, but they may not be following the principles of these farming methods. This can lead to confusion for consumers and undermine the credibility of the organic and biodynamic movements.

THE FUTURE OF ORGANIC AND BIODYNAMIC FARMING

Despite the challenges, organic and biodynamic farming are likely to continue to grow in the UK. As consumers become more aware of the benefits of these farming methods, they will likely demand more organic and biodynamic food. This will create a strong incentive for farmers to adopt these practices.

Additionally, there is a growing movement to support local food systems, which can help to reduce the barriers to organic and biodynamic farming. By growing and selling locally produced food, farmers can help to reduce the carbon footprint of the food system and support local jobs.

Finally, there is a growing interest in the spiritual and holistic aspects of biodynamic farming. This interest can help to attract new farmers to the biodynamic movement and create a more vibrant and sustainable food system.

CONCLUSION

Organic and biodynamic farming are two different approaches to agriculture, but they share many common goals. Both aim to produce food that is healthy, safe, and sustainable, while also protecting the environment and supporting local communities. While there are challenges to these farming methods, the benefits are significant, and they are likely to continue to grow in the UK.

THE AUTHOR

Memorandum is a writer and editor who has written for a variety of publications, including The Guardian, The Independent, and The Telegraph. She is passionate about sustainable living and local food systems, and she writes about these topics for a variety of audiences.

THE PICTURE

The picture shows a large, landscaped park with green lawns, trees, and a winding path. This is likely the park mentioned in the article, and it is a beautiful example of a well-maintained outdoor space.

THE VIDEO

The video shows a close-up of a person's hands working in a garden. The person is using a trowel to dig in the soil, and there are various plants and flowers visible in the background. This is a great example of the kind of work involved in organic and biodynamic farming.

THE AUDIO

The audio is a recording of a person speaking about organic and biodynamic farming. The person is enthusiastic and knowledgeable about the topic, and they provide a lot of useful information for anyone interested in these farming methods.

THE TRANSCRIPT

The transcript is a written version of the audio recording. It provides a detailed overview of the topics discussed in the video, and it is a great resource for anyone who wants to learn more about organic and biodynamic farming.

THE GALLERY

The gallery is a collection of images related to organic and biodynamic farming. It includes pictures of various plants, animals, and farming equipment, as well as images of people working in gardens and fields. This is a great way to see the results of organic and biodynamic farming in action.

THE MAP

The map shows the locations of various organic and biodynamic farms in the UK. It is a useful tool for anyone who wants to find a local organic or biodynamic farm to visit or buy from.

THE LIST

The list is a collection of links to various websites and resources related to organic and biodynamic farming. It includes links to organic and biodynamic certification schemes, as well as links to websites that provide information about organic and biodynamic farming practices.

THE FOOTNOTES

The footnotes provide additional information and references for the article. They include links to scientific studies, government reports, and other sources of information related to organic and biodynamic farming.

THE BIBLIOGRAPHY

The bibliography is a list of all the sources used in the article. It includes books, articles, websites, and other resources that were consulted during the research process.

THE INDEX

The index is a list of keywords and phrases that are used in the article. It is a useful tool for finding specific information within the article.

THE GLOSSARY

The glossary is a list of terms and definitions related to organic and biodynamic farming. It is a useful tool for anyone who is new to these farming methods and wants to learn more about the terminology.

THE APPENDICES

The appendices are additional resources and information related to organic and biodynamic farming. They include a list of organic and biodynamic farms in the UK, as well as a list of organic and biodynamic certification schemes.

THE END

The article concludes with a final statement about the importance of organic and biodynamic farming. It emphasizes the need for sustainable food systems and the role of organic and biodynamic farming in creating a more sustainable future.

THE CREDITS

The credits list the people and organizations that helped to create the article. It includes the author, the editor, and the various organizations that provided support and resources during the research process.

THE DISCLAIMER

The disclaimer is a statement that the article is for informational purposes only and does not constitute a recommendation or endorsement of any specific product or service. It also states that the author and publisher are not responsible for any errors or omissions in the article.

THE CONTACT INFORMATION

The contact information provides a way for readers to get in touch with the author or publisher. It includes an email address and a phone number.

THE ABOUT PAGE

The about page provides more information about the author and the publisher. It includes a bio of the author and a description of the publisher's mission and values.

THE FAQ

The FAQ is a list of frequently asked questions and answers related to organic and biodynamic farming. It is a useful resource for anyone who has questions about these farming methods.

THE NEWSLETTER SIGNUP

The newsletter signup is a form that allows readers to sign up for the publisher's newsletter. This will allow them to receive updates and news about organic and biodynamic farming.

THE DONATION PAGE

The donation page is a form that allows readers to make a donation to the publisher. This will help to support the publisher's mission and ensure that they can continue to provide high-quality content to their readers.

THE PRIVACY POLICY

The privacy policy is a document that explains how the publisher collects and uses personal information. It is a legal requirement for all websites that collect personal information, and it is a way to ensure that readers' privacy is protected.

THE TERMS AND CONDITIONS

The terms and conditions are a set of rules that govern the use of the website. They include information about the copyright and intellectual property of the website, as well as information about the liability of the publisher.

THE Sitemap

The sitemap is a list of all the pages on the website. It is a useful tool for search engines and for readers who want to navigate the website more easily.

THE SOCIAL MEDIA LINKS

The social media links are buttons that allow readers to follow the publisher on various social media platforms. This is a great way to stay up-to-date on the latest news and information from the publisher.

THE FEEDBACK FORM

The feedback form is a form that allows readers to provide feedback on the article or the website. This is a great way for the publisher to learn from their readers and improve their content and website.

THE GALLERY

The gallery is a collection of images related to organic and biodynamic farming. It includes pictures of various plants, animals, and farming equipment, as well as images of people working in gardens and fields. This is a great way to see the results of organic and biodynamic farming in action.

The established vineyard with vines to the South Downs has come to the market on the edge of Belsey village. Most houses.

Fishole Vineyard extends to about 30 acres, including 16 acres of well-established vines, with the remaining land down to grass. There is a shallow stone channel through the land with a small stream along with a small

The vines were planted in 2006/2009 and are now fully established. The majority are Pinot Noir with a small amount of Pinot Gris and Baccara vines. In previous harvests, the picked grapes have been used by a highly regarded local wine producer.

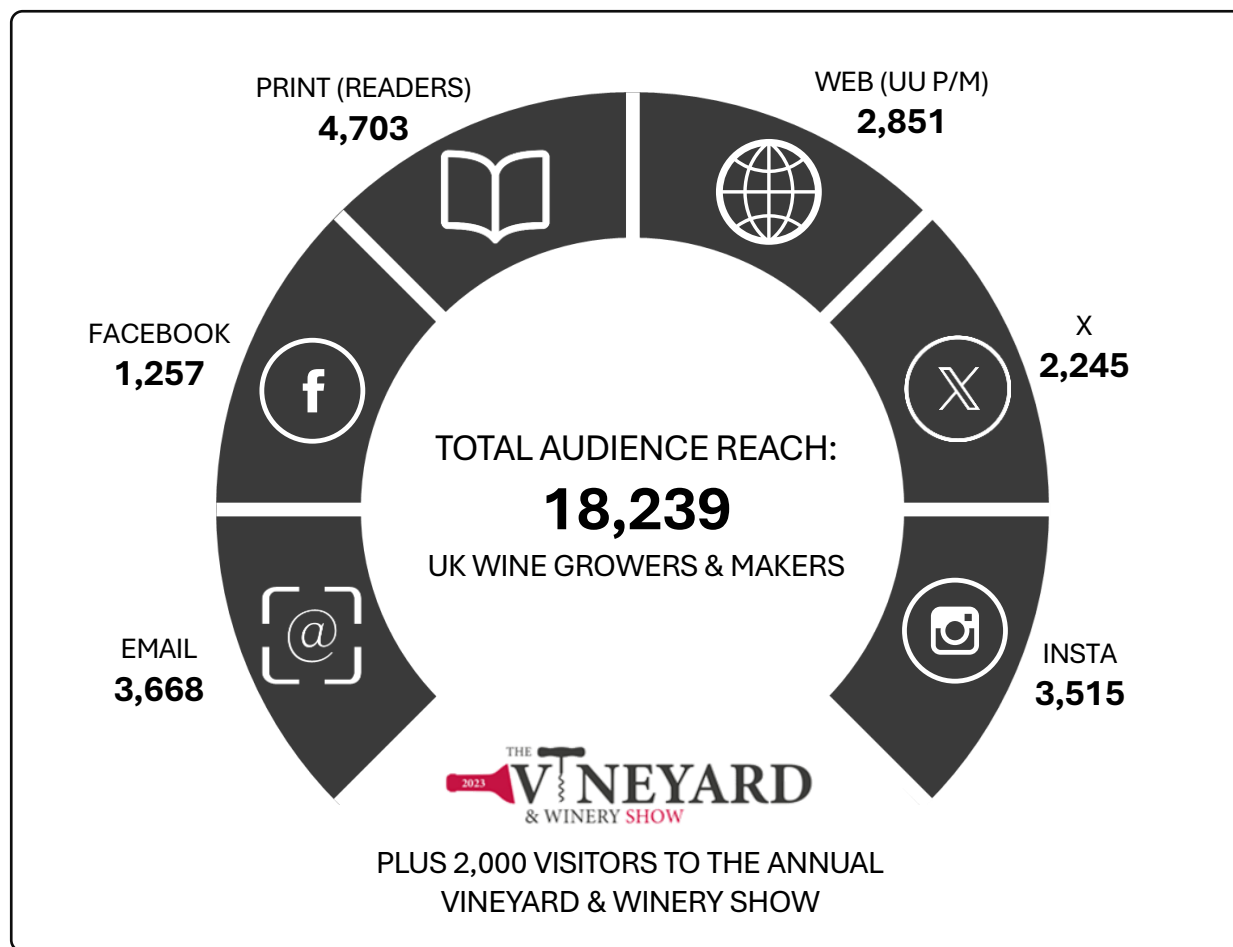

The next day, Peter rang his agreement and asked him to take the chemicals away and replace them with natural products including neem, garlic and Epsom salts. "They were very understanding," he said.

Vineyards of Hampshire Trade Tasting

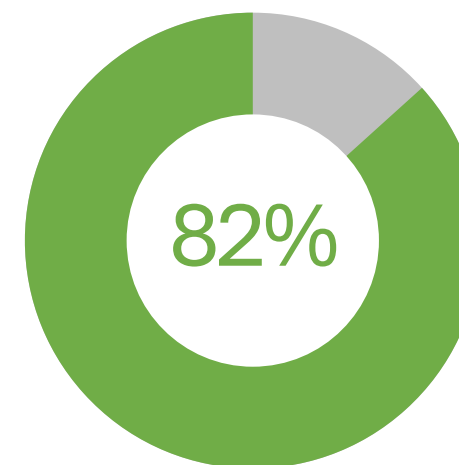

On 14th November, Hampshire Vineyards will be holding a trade tasting event at the Hampshire Vineyard Centre, 100, The Vineyard, Basingstoke, Hampshire RG24 0AA. The event will be held from 10.00am to 12.00pm and will be free of charge. The event will be held in the main hall of the centre and will be open to all members of the trade. The event will be held in the main hall of the centre and will be open to all members of the trade. The event will be held in the main hall of the centre and will be open to all members of the trade.

It's back – and promises to be bigger and better than ever! This year's Vineyard & Winery Show on 23 November will again feature great wines, unbeatable networking opportunities and a not-to-be-missed chance to catch up with what's new in the industry.

Vineyard brand reach

BRAND INFLUENCE

Vineyard is a unique resource for the industry, and as such is has a powerful influence. Almost all Vineyard's readers remember taking an action as a result of seeing something in the magazine or online.

This includes 47% who've recommended or discussed products. 60% remember visiting a supplier's site and/or buying a product as a result.

VINEYARD SPECIAL REPORTS

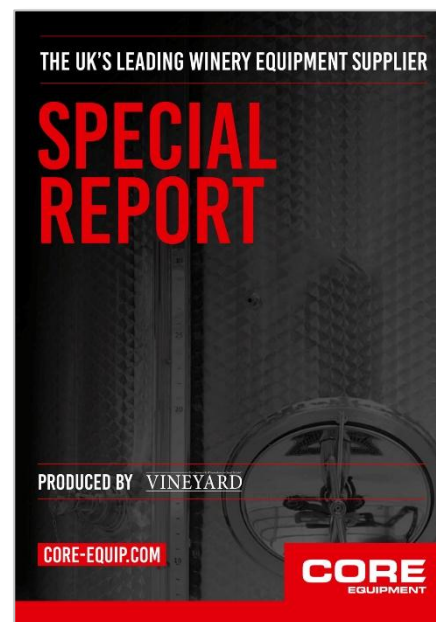

VINEYARD SPECIAL REPORTS

Example: Core Equipment

Vineyard Special Reports can be commissioned to provide audiences with engaging, in-depth stories. Vineyard journalists will find the angle and create the content, or work from a brief supplied by you.

As official supplier for a number of quality manufacturers, the Core example here is a 16pp report covering their supply and installation services for the wine industry.

Reprints can be used for promotional purposes, for example at events or in showrooms.

THE VINEYARD & WINERY SHOW

Kent Event Centre, November

The Vineyard & Winery Show provides the industry with a fantastic opportunity to keep up to date with the latest technology, meet with suppliers & allied trades that are supporting the industry, and the chance to network with key players in the UK wine marketplace.

Last year saw 2000 visitors and well over 100 stands.

The event has both sponsorship and integration opportunities, and these can be expanded into content solutions across the Vineyard editorial platforms.

For more information on attending or exhibiting, visit www.vineyardshow.com or telephone 01303 233883
