

## ACTION REQUIRED: Migrate Your API Integration to AGCO ID Before October 1, 2026

The legacy authentication platform (Trimble ID) and Trimble Gateway will be retired on **October 1, 2026**. To ensure uninterrupted access to PTx FarmENGAGE APIs, all integrations must be migrated to AGCO ID and all calls made via FarmENGAGE API's before this date.

To remain operational after **October 1, 2026**, you must:

- Migrate your authentication and authorization processes to AGCO ID.
  - <https://api-docs.farmengage.com/#tag/Overview-and-When-to-Use-1>
- Update your integration to use the new authentication framework and connectivity requirements.
- Complete testing and deployment prior to **October 1, 2026**.

### Impact of Not Migrating:

- Any API calls that rely on Trimble ID authentication and/or Trimble Gateway will fail.
- Your customers will no longer be able to access or exchange data with PTx FarmENGAGE through your application.
- Service interruptions will continue until your integration is updated using new API URLs and migrated to AGCO ID.

Please email [integrators@ptxag.com](mailto:integrators@ptxag.com) with the following information:

- Your application/integration name
- Technical contact person
- Business contact person
- Redirect-URLs
- Planned timeline for your update

Once we receive this information, we will provision your new AGCO ID Client ID and assist with the transition process. If you have already completed your migration to AGCO ID, no further action is required, and you may disregard this notice.
